# ProtectaDotDNA helps solve your burglary and theft problems for you... before they start.

---

Protect your most precious possessions, everything from your household goods like jewellery, laptops, tablets, televisions, handbags, gold or antiques to your office, factory, school, college, hospital equipment, local church, club and more. **ProtectaDotDNA** is a meaningful approach to stamping out burglary and re-sale of stolen property.

You too can be part of the **ProtectaDotDNA** success story.

At present it is almost impossible to actually prove that any piece of property is yours in the first place. If it is stolen or lost as there is no proper indisputable system of identification on the market to trace it back to you, the owner. This is a nightmare for property owners and the Gardaí and a gravy train for burglars and robbers. It provides the burglar with easy access to goods which they then can sell on for easy cash... a handy 100% profit for them.

The authorities have an enormous ongoing problem when they apprehend a suspect or suspects with suspicious items of property on them and suspect that these items are stolen.

They have to actually prove without doubt in court that it has been stolen. Without this, the authorities have reluctantly had to, in some cases, actually return the stolen property back to the burglars and robbers.

With our microdot based solution all of the above problems are solved for both the victims and authorities alike. The result is that the victims get their stolen property returned to them, the Gardaí get their successful convictions and the burglar is put out of business.

A win-win for both property owner and authorities alike. By marking your property through our system you leave it worthless to any would-be burglar so he / she will simply move on to another property that has not yet availed of our system.

### **Protect yourself first. Prevention is better than cure.**

Our systems are very affordable, available online and DIY friendly.

With our systems, we help stop the burglary from happening in the first place. We leave all your valuables worthless to any would-be thief by making them indelibly marked with irrefutable proof of ownership and traceable forever right back to you, the rightful owner.

## APPLICATION INSTRUCTIONS

### 1: Apply the warning labels first

Even if you do not have time to apply your ProtectaDotDNA this moment, apply the warning labels immediately.

### 2: Where should I apply ProtectaDotDNA?

- Apply the solution in as many concealed locations as you can.

### 3: How should I apply ProtectaDotDNA?

- Make sure the surface to be coded is clean, dry and free from dust, dirt or grease.
- Shake the bottle thoroughly before starting and occasionally during use.
- Allow the brush to pick up a few particles in the ProtectaDotDNA solution and apply a thin dab of the solution to the surface with a twisting action.

- (If using the sprayer, please see website [www.protectadotdna.com](http://www.protectadotdna.com))
- Apply a thin dab of the solution to the surface with a twisting action.
- The liquid is white when applied but becomes clear as it dries.
- The micro particles may show up as black specs, particularly on light surfaces, which is why it should be applied in concealed areas.
- When finished, clean the top of the bottle and replace the cap securely.

### 4: A few things to avoid

- **Don't** dilute the solution.
- **Don't** apply to moving parts. e.g. nuts and bolts, keys and switches.
- **Don't** apply onto surfaces which you wish to remain clear of marking. If this happens, then wipe immediately with a damp cloth.

*Liability for damage to property will not be accepted, if application guidelines are not followed correctly.*

#### IMPORTANT INFORMATION

Please keep ProtectaDotDNA out of the reach of children and animals. ProtectaDotDNA particles are suspended in a water based forensic adhesive and although not toxic, care should be taken not to drink or allow to enter the eyes. If swallowed, seek medical advice immediately. In the event of contact with the eyes, they should be flushed with clean water. Some sensitive skin types may be irritated by contact with the adhesive. In the event of contact, wash with soap and water.
