- Full anti-wear hydraulic fluids designed and developed to be used in industrial power transmission and control systems.

- Offer greater anti-wear characteristics, oxidation resistance and corrosion protection.

- Main application includes static industrial hydraulic systems and mobile earth moving plant.

Gear Oils

- Formulated to meet the lubrication requirements of a wide range of gear tooth form configurations, such as spur, bevel, helical, double helical, worm, spiral bevel and hypoid.
- Excellent anti-wear and EP properties, improved oxidation and rust resistance, demulsibility and antifoam characteristics.
- Particularly recommended in situations where EP characteristics are required and high operational temperatures are experienced.
